INFORMATION

We are an Aquaculture company located in Selangor, 32KM from Kuala Lumpur City Centre and seeking any interested parties as business partner for further expansion.

Our farm is currently equipped with electricity and water supply; and a tar road leading to our ponds.

The subject property is approximately 10 acre (4.057 hectares); at present with 19 units of concrete fish ponds. We have 3 big growing ponds, 3 medium growing ponds and 13 small ponds all together.

The source of water is natural river water leading to the ponds. These ponds are basically concrete structured ponds. The total gross floor area for these ponds are approximately 9621.27 sq metres with an average depth of 6 feet.

Our ponds are most suitable for all kinds of fresh water fishes especially prepared to produce high quality fishes and fresh water prawns. With adequate facilities and equipment; we can easily produce 50 tones of fishes monthly.

Any interested party in buying over or renting will also be considered.

Estimation value of land is 3.5 million and pond is 2.4 million; by registered valuers.
